

Marine Grade Acrylic Mirror

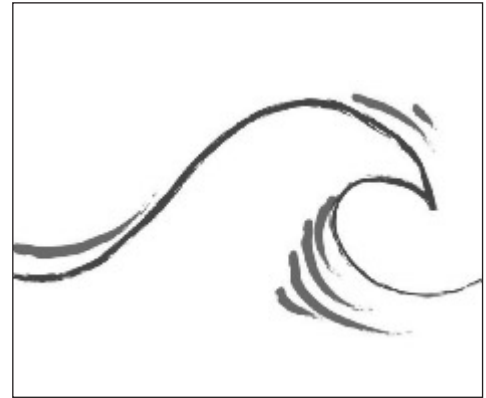

Marine Grade is a high quality, premium grade of Fabback acrylic mirror sheet.

This shatter-resistant mirror is used heavily in boat/yacht cabin areas, including bathrooms, bedrooms and main areas.

Marine Grade Mirror Sheet is double inspected throughout each manufacturing process to ensure maximum quality standards.

Offered in .118" (3mm) and .236" (6mm), 4' x 8', papermasked 2 sides. Abrasion Resistant Coating available.

For custom sizes, thicknesses and protective masking, call for availability.

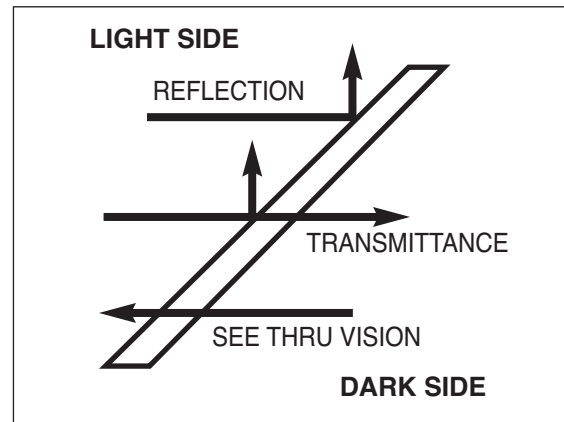

See-Thru Mirror

"See-Thru", sometimes called two-way mirror, is a semi-transparent film of aluminum deposited on an acrylic or polycarbonate substrate. This allows a percentage of incident light to pass through while reflecting the remainder.

From the illuminated side, it is a mirror. From the darkened side, it becomes transparent.

"See-Thru" has been used successfully in monitoring and surveillance operations in such places as stores, correctional and psychiatric institutions, hospitals, and casinos. "See-Thru" is also used to make infinity lights and multiple image devices. It can be used in advertising and for special theatrical props and effects.

"See-Thru" is available in colors and other substrates. For custom sizes and thicknesses, call for availability and delivery information.

See-Thru Acrylic Mirror

Item #	Description	Quantity
