Technical Service Bulletin 101

Subject: RoHS compliance

In response to increasing requests for compliance of Makrolon, VIVAK and VIVAK HT to RoHS, please be advised that all grades of these materials comply with the requirements of

- EU Directive 2002/95/EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment (called RoHS Directive).
- EU Directive 2002/96/EC on the waste electrical and electronic equipment (called WEEE-Directive).
- EU Directive 2003/11/EC, amending for the 24th time Council Directive 76/769/EEC, relating to restrictions on the marketing and use of certain dangerous substances and preparations (pentabromodiphenyl ether, octabromodiphenyl ether).

Compounds of cadmium, lead, mercury and hexavalent chromium, flame retardants PBB and PBDE including pentabromodiphenyl ether (CAS-No. 32534-81-9) and octabromodiphenyl ether (CAS-No. 32536-52-0), have not been intentionally added during the Sheffield Plastics manufacturing process. In addition, we would not expect the total of these compounds to exceed 100 ppm.

Please contact Sheffield Plastics Technical Department if you have any additional questions.
