Dear Valued Customer,

The Safe Drinking Water and Toxic Enforcement Act of 1986, also known as California Proposition 65, lists over 900 chemicals which are known to cause cancer or reproductive harm when over a defined exposure or safe harbor limit. This legislation imposes an obligation on manufacturers, producers, packagers, importers, suppliers and distributors of a product, as well as retail sellers to provide a clear and reasonable warning for all products that may expose the consumer to any of the listed substances. Amendments to these regulations by California's Office of Environmental Health Hazard Assessment (OEHHA), including the text and format of the "safe harbor" warning label, will take effect on August 30, 2018.

Although you are ultimately responsible for your compliance with these regulations and should consult your own legal counsel to determine your next steps, GEHR Plastics is providing the warning and information below that is available to us and providing you with this notice that you may have obligations under California Proposition 65.

WARNING: The GEHR products in the following table can expose you to the following chemicals, which are known to the state of California to cause cancer and/or reproductive harm (specific toxicity is also listed). For more information, go to www.P65Warnings.ca.gov.
