RE: California Proposition 65
Plaskolite Polycarbonate Plastic Products

To Whom It May Concern:

In 1986, California voters approved an initiative to address their growing concerns about exposure to toxic chemicals. That initiative became the Safe Drinking Water and Toxic Enforcement Act of 1986, better known by its original name of Proposition 65. Proposition 65 requires businesses to notify Californians about significant amounts of chemicals in the products they purchase, in their homes or workplaces, or that are released into the environment. The Office of Environmental Health Hazard Assessment (OEHHA), which is part of the California Environmental Protection Agency (Cal/EPA), administers the Proposition 65 program. Amendments to Article 6 (Clear and Reasonable Warnings) of the California Code of Regulations have been approved to provide, among other things, methods of transmission and content of warnings deemed to be compliant with Proposition 65, effective August 30, 2018.

Based upon reviews of the raw materials and manufacturing processes, the following Proposition 65 warnings are required for Plaskolite polycarbonate products, as applicable. Where available, the Proposition 65 "Safe Harbor" levels (i.e., Maximum Allowable Dose Level (MADL), No Significant Risk Level (NSRL) are also listed.

Extruded polycarbonate sheets and laminates (e.g., TUFFAK®, HYGARD®):

WARNING: This product can expose you to chemicals including Bisphenol A, which is known to the State of California to cause birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

California Proposition 65 Safe Harbor Level(s):

Maximum Allowable Dose Level (MADL) for Bisphenol A = 3 ug/day (dermal exposure from solid material)

For more health and safety information, please refer to the applicable Safety Data Sheet (SDS) at www.plaskolite.com. Please contact us at (800) 628-5084 if you have any questions related to this matter.

Sincerely,
Plaskolite Technical Support Team
