RE: European Chemicals Agency's (ECHA) Registration, Evaluation & Authorization of Chemicals (REACH) (EC 1907/2006) and Substances of Very High Concern (SVHC) Plaskolite Acrylic Products

To Whom It May Concern:

All Plaskolite acrylic products (e.g., Optix®, Duraplex®, Fabback®) are polymers which are exempt from registration under Article 6(3) of REACH. However, for those substances covered by REACH, such as monomers, Plaskolite has completed the process of REACH pre-registration or confirmed their pre-registration by our suppliers, where applicable.

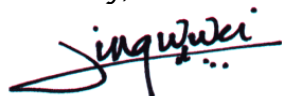

Plaskolite's acrylic sheet products, including acrylic mirror sheets, are "articles" according to Article 3(3) of REACH. In addition, we have determined that the substances used to make our acrylic sheet products are exempt from REACH registration because they will NOT be released "from the produced or imported article(s) during normal and reasonable foreseeable conditions of use (Article 7(1))."

Plaskolite's acrylic resin pellets, however, require REACH registration for some of their substances, and we have completed the REACH pre-registration for these affected substances or confirmed their pre-registration by our suppliers. In support of our REACH pre-registration, we have designated Mr. Joop Borghuis (BTS International, Doetinchem, Netherlands) as the "Only Representative" (OR) for Plaskolite under REACH.

Finally, Plaskolite certifies, based upon knowledge of our ingredients and manufacturing processes, that our acrylic products (resin pellets and sheets) DO NOT contain the chemicals identified as Substances of Very High Concern (SVHC) by the European Chemical Agency (ECHA) Member State Committee (current as of July 2011).

We hope that this information is useful to you, and provides clarity on Plaskolite's compliance with REACH. Please contact us at (614) 294-3281 if you have any questions related to this matter.

Sincerely,

Timothy W. Ling, P.E.
Corporate Environmental Manager
