

# Plast-O-Matic

## Valves, Inc.

## EU RoHS Directive

Dear Customer/Distributor:

The 25 member nations of the European Union (EU) have set a July 1, 2006 target date for compliance with the RoHS (Reduction of Hazardous Substances) Directive. The intent of this Directive is to eliminate the following hazardous substances from electric/electronic equipment components.

Hg - Mercury, Cd - Cadmium, Pb - Lead, CrVI(Cr+6) - Hexavalent Chromium, PBDE - Polybrominated Diphenyl Ethers, PBB - Polybrominated Biphenyls

Relative to your recent inquiry please be aware that the RoHS Directive is applicable solely to electrical and electronic equipment sold to the 25 member nations of the European Union (EU). The following Plast-O-Matic products do not fall into this classification and are totally exempt from the directive:

Series ABRA, ABRS, ABVA, ABVS, ARV, BAT, BFS, BLT, BSD, BSDA, BSR, BST, CK, CKD, CKM, CKS, DGV, F, FC, GGM, GGME, GGMU, GL, GX/GY, GYW, LMBV, MFR, PR/PRA, PRE/PRH, PRM, PRD, PRU, RVD, RVDM, RVDT, TABRA, TABRS, TABVA, TABVS, TUCA, VB/VBM, VBS, and VPA.

We are currently making inquiries of our outsourced electrical and electronic components suppliers for Series EBV, SWT and the W11/ W20 solenoid coils. It is our intent to correct any non-compliances (should such be found to exist) far in advance of the July 1, 2006 deadline. However, it is our belief that we are currently in compliance with the spirit of this EU Directive.

Additionally, all Plast-O-Matic Valves, Inc. internal manufacturing procedures are RoHS compliant.

Sincerely,

Bob Sinclair  
Vice-President, Sales
