

Declaration

Customer: Aetna Plastics
Date: 5/31/2018

Item Descriptions: Pipes and Tubes

Reach and ROHS

It is our understanding at this point in time that all the materials we supply to you may be considered as “**articles that don’t intentionally release substances**” and hence do not have obligations under REACH initiatives as long as they do not contain toxic chemicals at levels above 0.1% by weight.

None of the REACH **Substances of Very High Concern (SVHC)** listed as of 1/15/2018 (181 chemicals) are used as ingredients or processes by Delstar Technologies for our suppliers. None of these materials are present in our products at concentrations of 0.1% or higher. REACH is compliant to EC1907/2006 requirements.

The chemicals listed in Annex II are not used in the manufacturing and formulation of this product. Annex II chemicals include the following: lead, mercury, chromium, hexavalent chromium, polybrominated diphenyl and diphenyl ethers. The chemicals in Annex VII are not used in the manufacturing or formulation of this product.

Delstar Technologies complies with **RoHS 2/3 regulations**, 2011/65/EC, 2017/1011 and its subsequent amendments. Also complies with Directive EU 2015/863 with 4 additional phthalates:

- Bis(2-Ethylhexyl) phthalate (DEHP): max 0.1%;
- Benzyl butyl phthalate (BBP): max 0.1%;
- Dibutyl phthalate (DBP): max 0.1%;
- Diisobutyl phthalate (DIBP): max 0.1%.

Proposition 65

Upon review from the external provider, this product does not contain the following intentionally added substance(s) listed in the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65), last updated December 29, 2017.

Specifically, these substances are not intentionally added and our manufacturing process is not expected to create these substances as impurities or by-product.

Conflict Minerals

On August 22, 2012, the U.S. Securities and Exchange Commission (“SEC”) issued the final conflict minerals rule under Section 1502 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Conflict Minerals Rule”). The Conflict Minerals Rule requires publicly traded companies to

report annually the presence of conflict minerals (tin, tungsten, tantalum and gold, or “3TG”) originating in the Democratic Republic of the Congo or specified adjoining countries (Angola Burundi, Central Africa Republic, Rwanda, South Sudan, Tanzania, Uganda, and Zambia)

Tin, tantalum, tungsten or gold are not necessary to the functionality or production of any product manufactured by SWM. These elements are not intentionally added to the formulation or in the manufacturing process of the raw materials.

This information in this document is to our knowledge true and accurate at the time and date of issue.

Thank you.

Geraldine Shiff,

Product Compliance and Stewardship Specialist
