

RoHS STATEMENT OF COMPLIANCE

The European Union directives on the “Restriction of Hazardous Substances” (RoHS) was published in 2003. It controls the use of specified hazardous substances in electronic and electrical equipment and vehicles sold in Europe beginning in July 2006. **The details and regulations for RoHS can be accessed on www.rohs.gov.uk.**

The materials specified are lead, mercury, cadmium, hexavalent chromium and certain flame retardants used in plastics: polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

Trelleborg Sealing Solutions Broomfield, as a producer of spring energized seals, sealing systems and polymer bearings for use in various industries, is committed to complying with the RoHS, WEEE and ELV directives and to fully support customers in their compliance. The Trelleborg Sealing Solutions Broomfield PN below is compliant with the RoHS, WEEE and ELV directives.

If there are any questions about the RoHS compliance of any Trelleborg Sealing Solutions Broomfield product, feel free to contact the factory.

PN: Turcite A, Turcite X
