Dear Valued Supplier:

Pursuant to Conflict Minerals:

To the best of our knowledge, Vycom's tin metal and PVC heat stabilizers use materials sourced from conflict free zones. The vast majority of our tin metal is produced from materials sourced from our suppliers own mines located in China and Australia, which are not located in conflict mineral regions.

As an environmentally and socially responsible supplier, Vycom does not knowingly support or use conflict minerals which directly or indirectly finance or benefit armed groups in the Democratic Republic of Congo or adjoining countries, in line with legislation from Section 1502 of the U.S. Dodd-Frank Wall Street Reform Act.

Please be assured that we understand the importance of this issue and thank you for your continued interest in our products. We also recommend you consult the Securities and Exchange Commission (SEC) regulations for the actual reporting requirements under this law
